Restaurant industry specialists	Pricing based on users not number of restaurants	Training and Support	Integrations and automations

Tablespoon Helps Wendy's® Franchisees Serve Up Success

Your Wendy's® franchise business has a unique set of challenges and opportunities. It's crucial to partner with a firm that knows your specific challenges. Don't take our word for it, here are some recent results from recent case studies.

Faster Month-End Close

"Closing the books faster is huge for us. Once accounting is done entering everything into Sage Intacct, it's done. We are saving so much time every month." - Mountain West Wendy's Group

Time Savings

"Yes, we close our books quicker on Sage Intacct vs. Microsoft Dynamics GP, however what's really impressive is the time savings when running investor checks. It used to take us 3-hours running checks, and now it takes 10-minutes." - Innovative Dining Group

Real-Time Reporting & Dashboards

"Now with Sage Intacct, we import sales daily. It has vastly improved our financial health accuracy, as well as provide more insight. District Managers can easily run a middle of the month report in Sage Intacct and see the information they need." - Mountain West Wendy's Group

Standardized Accounting Practices

The blend of Tablespoon's experience and Sage Intacct's best-in-class cloud-based platform made us extremely happy. Sage Intacct's ability to drill down into the data is impressive. I'm able to see my finances at a high-level and break it down to specific invoices. Knowing when and where money is spent is important to running my business" - Fun For All Management
